

ATTENTION: VIDIO CONFRENCING NOW AVAILABLE AT IWHCS!!!

Innovative Direct

I chose obstetrics and gynecology so as to have a life-long impact on women and the children they bare. A woman's relationship with her gynecologist is unique and special. Because so many intimate details are often shared, it's important that you have someone that you can talk to, someone who will listen, day, night or whenever the need arises. With that in mind, Innovative Women's HealthCare Solutions is excited to introduce Innovative Direct.

Innovative Direct connects you with a healthcare provider you know and trust.

One who cares AND understands you and your particular needs. Someone who has your secured health-care information at their fingertips.

Now results and other medical information can be safely shared and discussed via video conferencing in a secure, HIPPA-approved site at the time and place of your choice.
